

This is the industry's most powerful microcomputer (it's also a powerful Z-80 μ P development system)

Uses high-speed Z-80 μ P

You see here a major new development in microcomputers: the Cromemco Z-1.

It is the fastest and most powerful microcomputer available.

It gets its speed and power from a selected version of the new Z-80 microprocessor that can operate at a 4 MHz clock rate. (The Z-1 also lets you switch to 2 MHz to be compatible with older systems.)

μ P development system

In addition to being a powerful microcomputer the Z-1 is a major μ P development system. It will give you a big head start in developing your circuits around the Z-80 μ P.

All you need do is plug your breadboards into the Z-1's 18 or more extra sockets.

Broad "S-100" support

What's more, the Z-1 offers you all kinds of peripherals and software. It uses the standard "S-100"

bus supported by over a dozen manufacturers. And all Cromemco peripherals (PROM memory and programmer, RAM memory, analog I/O, color TV interface, etc.) just plug into the Z-1's extra sockets.

Cromemco also provides complete software support: a monitor, assembler, BASIC interpreter and more to come soon.

Another thing: you can bet the Z-1 won't be obsolete. Future CPU cards can plug in for the present CPU card.

Not a kit

The Z-1 comes completely assembled and tested. It's a quality, commercial-grade microcomputer. It

is not available as a kit. Just plug it into the 110-volt line and you're ready to go.

The Z-1's ready, too. It's being shipped. And for all you get, the low \$2495 price is a pleasant surprise. It's especially pleasant when you compare it with the price of any **complete, assembled** microcomputer with all the Z-1's features.

Call now and get our brochure on this new system which is so important in working with the Z-80.

Z-1 components

- Z-80/4 CPU
- 8K static RAM
- Capacity for 8K PROM
- PROM programmer
- Resident monitor in PROM
- RS-232 I/O
- Full 22-slot motherboard and connectors
- Fan installed
- Not a kit; completely assembled
